Azeno™

Single tooth replacement

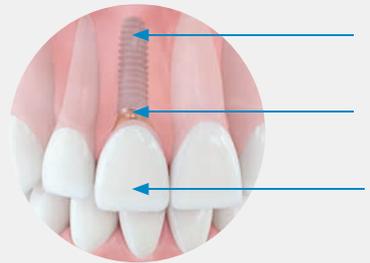

The customized dental implant solution

THE DENTAL SOLUTIONS COMPANY™

Implants for life - like natural teeth

Dental implants are the optimal solution for the permanent replacement of one or more teeth. They integrate with the jawbone, becoming the foundation for new teeth. You can laugh and eat with confidence with teeth that are securely held in place by dental implants.

Dental implant in actual size
An abutment on top of the dental implant
Crown supported by dental implant

Fully functioning and esthetic

Implants provide excellent function and esthetics and can increase your confidence and quality of life.

Maintain your facial structure

Anchoring dental implants in the jawbone stimulates bone growth and gum tissue.

Safer treatment and same day temporization

Implants are safe and simple. Often you receive a fully functioning temporization on the day of surgery.

Fewer visits and cost-effective

Implants can reduce the need for bone grafting and other advanced procedures, resulting in fewer visits and lower associated costs.

Azento™ implants straightforward

Azento™ is a treatment process developed by Dentsply Sirona for fast, gentle and safe implant treatment if you have lost a single tooth.

Fully digital planning prior to implant placement ensures maximum accuracy and individual adaptation to almost any jawbone structure.

The implant components are custom-made based on your treatment plan and sent to your dentist.

The implant is placed into the exact planned position. The dental gap is then provisionally filled with a temporary crown to create a visually appealing and functional state.

Following the healing phase, the temporary crown is replaced by a permanent crown that matches the color of your teeth.

An esthetically pleasing, fully functional result. The treatment is only followed by routine examinations.

The Azento™ process

Azento™ benefits

- Fewer visits
- Custom-made for you
- Authentic look
- No damage to other teeth

Azento™ is gentle and safe

In just a few treatment steps, the implant is integrated into your jaw looking and feeling like a natural tooth. A long-term solution for renewed quality of life.

Ask your dentist if you have any additional questions about the treatment and the Azento™ solution.
